sticky artists (in release radar)

UPDATE: This is all about voting in dynamic playlists. If you don't vote, AI isn't feeded, so it switches to a quantitative strategy and promotes artists with the highest song output.

A list of artists literally sticking inside my release radar since I stumbled upon them. This list is made to figure out why it is this way.

My idea now is that the algorithm for it depends on voting and is running nuts when you don't vote to give him an idea what you like.

I'm trying to figure out how focused on that single playlist the algorithm really is, and what role favorite songs are in all that KI game there.

I've written about that (in German language) here:

<https://notizlo.ch/das-release-radar-von-spotify-ist-nett-und-merkwuerdig/>

Artists I searched for

artists I searched for and completely lost interest since then.

by name

- [Elène](#)

by music style

- [Michiru Aoyama](#)

Artists I know from years ago

these artists had been my favorites years ago

by name and former fav. music style

- [Gareth Emery](#)

Fremder Menschen Discover Weekly (und Release Radar) folgen

Man kann die Playlists vom Discover Weekly und vom Release Radar nicht direkt aufrufen, bekommt man einen Link von jemandem, führt der zu den eigenen Iterationen der Playlists.

1. Profillink der anderen Person aufrufen
2. dort in den öffentlichen Playlists stöbern, darunter ist Discover Weekly und release radar
3. diesen Playlists folgen

So bekommt ihr fremde Discover Weeklys anderer Musikgeschmäcker in euer Spotify und könnt aus eurer musikalischen bubble ausbrechen.
