

# Raspberry Pi LEDs abschalten

## 4B

<https://smarthomescene.com/guides/how-to-disable-leds-on-raspberry-pi-3b-4b/>

```
#!/bin/bash
sudo cp /boot/firmware/config.txt /boot/firmware/config.txt.bak
sudo sed -i 'li\
# Turn off LEDs
dtparam=pwr_led_trigger=default-on\
dtparam=pwr_led_activelow=off\
dtparam=act_led_trigger=none\
dtparam=act_led_activelow=off\
dtparam=eth_led0=4\
dtparam=eth_led1=4\
' /boot/firmware/config.txt
```
